Online Agentic Hackathon Problem Statements

1. Travel Planner Agent with Budget Constraints

Input:-

- Budget
- Number of days
- City preference
- Activity preferences

The agent must:

1. Break the plan into days
2. Allocate activities within time + budget constraints
3. Re-plan if the budget is exceeded
4. Generate final itinerary + cost breakdown Why

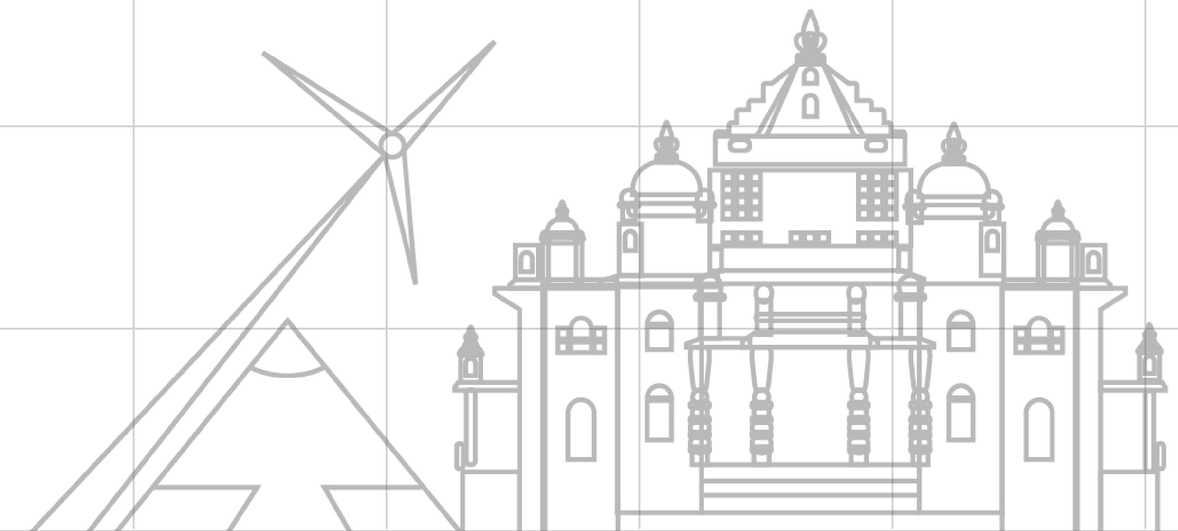

Agentic:

Requires planning → checking → re-planning loops + rule-based constraints
